

Integration on Facebook via Dialogflow

By: Fahim Uz Zaman and
Alifya Hussain

Prerequisite

1. Facebook Page
 2. Chatbot on Dialogflow
- 

Facebook Messenger

An easier way to message.

Create and teach a conversational bot for Facebook Messenger.

After you design and test your Dialogflow agent, you can launch your Messenger bot

1. Get your Facebook Page Access Token and insert it in the field below.
2. Create your own Verify Token (can be any string).
3. Click 'START' below.
4. Use the Callback URL and Verify Token to create an event in the Facebook Messenger Webhook Setup.

[More in documentation.](#)

☐ Show old callback URL (more details [here](#))

Looking for additional products and permissions?

We've streamlined the app creation process by surfacing only the products and permissions needed to build your selected app type. If you need to request additional products and permissions, you can view more options by removing your app type or creating a new app with a different app type. [Learn More](#)

Get Started

Check out some resources that may help you in development: [Quick Start](#) (build a Messenger app in 10 minutes) and [Complete Documentation](#). Also join our [Messenger Platform Developers Community](#) on Facebook to get latest news and learn more!

Access Tokens

[Create New Page](#)

Generate a Page access token to start using the platform APIs. You will be able to generate an access token for a Page if:

1. You are one of the Page admins, and
2. The app has been granted the Page's permission to manage and access Page conversations in Messenger.

Note: If your app is in dev mode, you can still generate a token but will only be able to access people who manage the app or Page.

[Add or Remove Pages](#)

Add the fb page in your app

Webhooks

To receive messages and other events sent by Messenger users, the app should enable webhooks integration.

Callback URL

<https://bots.dialogflow.com/facebook/4ad6ab4a-401f-484e-81e1-596249...>

Verify Token

.....

Validation requests and Webhook notifications for this object will be sent to this URL.

Token that Facebook will echo back to you as part of callb verification.
